RIZKY HERMAWAN

SOFTWARE ENGINEER

Gunung Putri, Jawa Barat, Indonesia | rhermawan56@gmail.com | github.com/rhermawan56 | www.linkedin.com/in/rizky-hermawan-29a15a154 | +6281398806024

PROFESSIONAL SUMMARY

Software Engineer dengan spesialisasi Backend dan 4+ tahun pengalaman membangun sistem enterprise pada industri manufaktur. Berpengalaman merancang arsitektur ERP end-to-end (Purchasing, Sales, Inventory, Production, HRIS), integrasi hardware absensi via API, serta manajemen database relasional beban tinggi. Terbiasa mengelola infrastruktur high availability berbasis kluster Proxmox VE, containerisasi Docker, dan MariaDB MaxScale.

TECHNICAL SKILLS

Backend: PHP (Laravel, CodeIgniter), RESTful API, Object-Oriented Programming (OOP), SOLID Principles, MVC Architecture, Authentication & Authorization, Relational Database Design

Frontend: Vue.js (Composition & Options API), Inertia.js, JavaScript (ES6+), jQuery, DataTables, HTML5, CSS3, Tailwind CSS, Bootstrap

Database: MySQL / MariaDB, PostgreSQL, Query & Index Optimization, Stored Procedures, Triggers, Database Migration, Eloquent ORM

DevOps & Infrastructure: Docker, Docker Compose, Proxmox VE, MariaDB MaxScale (Clustering, Failover, Load Balancing), Linux Server Administration, Nginx, Apache

Tools & Workflow: Git, Git Flow, Branching Strategy, Cherry-picking, Postman, Linux CLI

PROFESSIONAL EXPERIENCE

Software Engineer (Backend) at PT. KAHAPTEX

2022 - Sekarang

- Merancang dan membangun arsitektur ERP end-to-end yang mengintegrasikan alur operasional perusahaan melalui modul Purchasing, Sales, Inventory, Production, dan HRIS.
- Mengembangkan Manufacturing Planning System berbasis CodeIgniter untuk pemetaan alur kerja, jadwal mesin, dan pemantauan tahapan produksi tekstil.
- Mengintegrasikan modul absensi HRIS dengan FingerSpot Biometric API untuk otomatisasi sinkronisasi presensi harian karyawan dan rekap data payroll.
- Mengoptimalkan performa database MySQL dan PostgreSQL melalui index profiling, optimasi relasi query transaksi tinggi, serta efisiensi stored procedures.
- Mengonfigurasi arsitektur infrastruktur high availability pada 3 node server Proxmox VE, Docker, serta implementasi load balancing dan failover database via MariaDB MaxScale.

SELECTED PROJECTS

Enterprise Resource Planning

Technology: PHP (Laravel), MariaDB, Vue.js, Inertia.js, Docker

Manufacturing Planning System

Technology: CodeIgniter, MySQL, JavaScript

Human Resource & Attendance

Technology: PHP (Laravel), MySQL, Vue.js, Inertia.js, FingerSpot API

EDUCATION

Bachelor of Informatics Engineering (S.T)

Universitas Sangga Buana (USB) YPKP, Bandung
